— and THOMAS, LEWIS. The relationship between the vascular manifestations of shock produced by endotoxin, trauma, and hemorrhage. I. Certain similarities between the reactions in normal and endotoxin-tolerant rats, 385

INDEX TO SUBJECTS

ABDOMINAL and thoracic aorta, oxygen consumption between, dissimilarity, 357
Acid, nucleic, metabolism, growth characteristics of poliovirus in HeLa cells, 641
— sequence, amino, preparation, and purification of polypeptide renin substrate, 439
Acids, nucleic, cytochemical study of L.E. bodies of systemic lupus erythematosus, 575
—, nucleic, of T_2, T_4, and T_6 bacteriophages, 233
ACTH. *See* Adrenocorticotropic.
Adrenocorticotropic, pituitary, and growth hormones, effect on resistance to infection with *Pasteurella pestis*, 127
Agar, diffusion in, poliovirus precipitins studied by, 661
Agglutinins, red cell, physical properties, in acquired hemolytic anemia, 689
Amino acid sequence, preparation, and purification of a polypeptide renin substrate, 439
Ammoniated glycyrrhizin, desoxycorticosterone-mimetic action of, 415
Anaphylaxis, passive cutaneous, participation of complement, hypersensitivity phenomena, 811
Anemia, acquired hemolytic, physical properties of red cell agglutinins, 689
Antibody, fluorescent, detection of antigens of Shope papilloma virus in wild and domestic rabbits, 555
—, homotypic, infection induced by oral administration of attenuated poliovirus to persons possessing, 159
Antibody, natural, in rejection of mouse tumor cells by chick embryo, 111
— response to influenza virus vaccines, predetermination by infection and vaccination, 835
Anticephalin hypothesis, analysis, in pathogenesis of hemophilia, 273
Antigen, protein, impairment of antigenicity following injection, 219
—, R, differentiation of group A streptococci with, into three serological types, bactericidal test, 525
Antigenic relationship of pathological macroglobulins to normal gamma globulins, 467
Antigenicity of protein antigen, impairment following injection, 219
Antigens of Shope papilloma virus in wild and domestic rabbit detection by fluorescent antibody, 555
Antisera specific for pathological macroglobulins, 477
Antiserum, homologous, long chain formation by strains of group A streptococci in presence of, type-specific reaction, 345
Aorta, abdominal and thoracic, oxygen consumption between, dissimilarity, 357
Ascites tumor cells, Ehrlich, infection with "chick embryo–adapted" Newcastle disease virus, electron microscope study, 617
Atherogenic diet, influence of dietary magnesium on cardiac and renal lesions of young rats, 767
Atherosclerosis, hypercholesteremia, and magnesium requirement, interrelationships, 757

BACTERIA, intestinal, in dietary cirrhosis, 1
Bacterial endotoxins and polysaccharides of animal and plant origin, similarity of host responses elicited by, 77
Bactericidal test in differentiation of group A streptococci with R antigen into three serological types, 525
Bacteriophages of hemolytic streptococci, factors influencing interaction of phage and susceptible host cell, 365
—, T_2, T_4, and T_6, nucleic acids of, 233
Bodies, L.E., of systemic lupus erythematosus, cytochemical study, nucleic acids, 575
—, L.E., of systemic lupus erythematosus, proteins, 593
Brucella melitensis, intracellular behavior in monocytes from vaccinated animals, in cross-immunity between *Brucella melitensis* and *Mycobacterium tuberculosis*, 545

CARBON-14–cholesterol-4, esterification and disappearance of, in studies on dietary fat and hypercholesteremia in *Cebus* monkey, 727
Cardiac. *See* Heart.
Cell, extracellular product of streptococcal growth, diphosphopyridine nucleotidase, and relationship to leucotoxicity, 27
—, intracellular behavior of *Brucella melitensis* in monocytes from vaccinated animals, in cross-immunity between *Brucella melitensis* and *Mycobacterium tuberculosis*, 545
— phenomenon, L.E., phase contrast and interferometric microscopy, 607
— reaction, L.E., observation on, role of gamma globulins in pathogenesis of renal lesions in systemic lupus erythematosus and chronic membranous glomerulonephritis, 191
Cell, red, agglutinins, physical properties, in acquired hemolytic anemia, 689
—, susceptible host, and phage, factors influencing interaction, in studies on bacteriophages of hemolytic streptococci, 365
Cells, Ehrlich ascites tumor, infection with "chick embryo–adapted" Newcastle disease virus, electron microscope study, 617
— from normal human tissues, effect of x-rays on survival curves of, 485
—, HeLa, growth characteristics of poliovirus in, nucleic acid metabolism, 641
—, L, in tissue culture, latent psittacosis virus infection of, 39
—, mouse tumor, natural antibody in rejection by chick embryo, 111
—, single epithelioid and fibroblast-like, from variety of human organs, growth and genetic characteristics, 145
Cellular constituents of mycobacteria, effects on resistance of mice to heterologous infections, enhancement of infection, 719
— constituents of mycobacteria, effects on resistance of mice to heterologous infections, protective effects, 703
— sites of formation of gamma globulin, 627
Cephalin, anti-, hypothesis, analysis, in pathogenesis of hemophilia, 273
Cerebral activity of pleuropneumonia-like organisms in mice, enhancing effect of murine hepatitis virus, 179
Chain formation, long, by strains of group A streptococci in presence of homologous antiserum, type-specific reaction, 345

Cholesterol-4–carbon-14, esterification and disappearance in studies on dietary fat and hypercholesteremia in *Cebus* monkey, 727
Cirrhosis, dietary, intestinal bacteria in development of, 1
Clonal growth *in vitro* of human cells with fibroblastic morphology, 145
Complement, first component of, properties of esterase derived from preparations of, 327
— participation in passive cutaneous anaphylaxis, hypersensitivity phenomena, 811
Corticosterone, desoxy-, mimetic, action of ammoniated glycyrrhizin, 415
Cortisone, effects on dynamics of influenza virus infection, 851
— inducing increased virus yields, negation of interference as mechanism, 863
— and inhibition of influenza virus synthesis, 883
Coxsackie viruses, neuropathogenicity of group A, 69
Cultivation, localization, and isolation of primary atypical pneumonia virus in chick embryos, 455
Culture, tissue, L cells in, latent infection with psittacosis virus, 39
Cutaneous anaphylaxis, passive, participation of complement, in hypersensitivity phenomena, 811
Cytochemical study of L.E. bodies of systemic lupus erythematosus, nucleic acids, 575
— study of L.E. bodies of systemic lupus erythematosus, proteins, 593

DESOXYCORTICOSTERONE-MIMETIC action of ammoniated glycyrrhizin, 415
Diaphyses and epiphyses of suckling rats, turnover of sulfate labelled with sulfur-35, nature of, 509
Diarrhea of infant mice, epidemic, etiology and transmission, 743
Dietary cirrhosis, intestinal bacteria in development of, 1
— fat and hypercholesteremia in *Cebus* monkey, esterification and disappearance of cholesterol-4–carbon-14, 727
— magnesium, influence on cardiac and renal lesions of young rats fed atherogenic diet, 767
Diphosphopyridine nucleotidase, extracellular product of streptococcal growth and relationship to leucotoxicity, 27
— nucleotide, streptococcal enzyme acting specifically upon, separation of enzyme from streptolysin O, 15
Disease, Newcastle, virus, infection of Ehrlich ascites tumor cells with "chick embryo–adapted" NDV, electron microscope study, 617

ECHO viruses, infection of chimpanzees, 677
Ehrlich ascites tumor cells, infection with "chick embryo–adapted" Newcastle disease virus, electron microscope study, 617
Electrolyte imbalance, renal lesions, structural alterations in potassium-depleted rats, 563
Electron microscope study of glomerulus in nephrosis, glomerulonephritis, and lupus erythematosus, 649
— microscopic study of incomplete virus formation, infection of Ehrlich ascites tumor cells with "chick embryo–adapted" Newcastle disease virus, 617
— microscopy in study of hemosiderosis, relationship between hemosiderin and ferritin, 203
Embryo, chick, natural antibody in rejection of mouse tumor cells by, 111

Embryo-adapted Newcastle disease virus, chick, infection of Ehrlich ascites tumor cells with, electron microscope study, 617
Embryos, chick, localization, isolation, and cultivation of primary atypical pneumonia virus in, 455
Endotoxin, trauma, and hemorrhage, vascular manifestations of shock produced by, role of reticulo-endothelial system in resistance to, 403
—, trauma, and hemorrhage, vascular manifestations of shock produced by, similarities between reactions in normal and endotoxin-tolerant rats, 385
Endotoxins, bacterial, and polysaccharides of animal and plant origin, similarity of host responses elicited by, 77
Enzymatic variants of influenza B virus, slowly reacting, isolation and characterization, 53
Enzyme, streptococcal, acting specifically upon diphosphopyridine nucleotide, separation from streptolysin O, 15
Epidemic diarrhea of infant mice, etiology and transmission, 743
Epiphyses and diaphyses of suckling rats, turnover of sulfate labelled with sulfur-35, nature of, 509
Epithelioid, single, and fibroblast-like cells from variety of human organs, growth and genetic characteristics, 145
Erythematosus, lupus, cell phenomenon, phase contrast and interferometric microscopy of, 607
—, lupus, nephrosis, and glomerulonephritis, electron microscope study of glomerulus in, 649
—, lupus, systemic, and chronic membranous glomerulonephritis, role of gamma globulins in pathogenesis of renal lesions in, observation on L.E. cell reaction, 191
Erythematosus, lupus, systemic, cytochemical study of L.E. bodies, nucleic acids, 575
—, lupus, systemic, cytochemical study of L.E. bodies, proteins, 593
Esterase derived from preparations of first component of complement, properties, 327
Esterification and disappearance of cholesterol-4-carbon-14, in studies on dietary fat and hypercholesteremia in *Cebus* monkey, 727
Etiology and transmission of epidemic diarrhea of infant mice, 743

FAT, dietary, and hypercholesteremia in *Cebus* monkey, esterification and disappearance of cholesterol-4–carbon-14, 727
Ferritin and hemosiderin, relationship between, study of hemosiderosis with electron microscopy, 203
Fever pathogenesis, endogenous serum pyrogen and mechanisms governing release, 787
Fever-producing substances in serum, studies on pathogenesis of, 293
Fibroblast-like and single epithelioid cells from variety of human organs, growth and genetic characteristics, 145
Fluorescent antibody detection of antigens of Shope papilloma virus in wild and domestic rabbit, 555

GENETIC and growth characteristics of single epithelioid and fibroblast-like cells from variety of human organs, 145
Globulin, gamma, cellular sites of formation of, 627
Globulins, gamma, in pathogenesis of renal lesions in systemic lupus erythematosus and chronic membranous glomerulonephritis, L.E. cell reaction, 191

Globulins, normal gamma, antigenic relationship of pathological macroglobulins to, 467
Glomerulonephritis, chronic membranous, and systemic lupus erythematosus, role of gamma globulins in pathogenesis of renal lesions in, observation on L.E. cell reaction, 191
—, lupus erythematosus, and nephrosis, electron microscope study of glomerulus in, 649
Glomerulus in nephrosis, glomerulonephritis, and lupus erythematosus, electron microscope study, 649
Glycyrrhizin, ammoniated, desoxycorticosterone-mimetic action, 415
Granulocytopenia, leucopenia with, in mucormycosis, *Rhizopus oryzae* infection, 501
Growth and pituitary adrenocorticotropic hormones, effect on resistance to infections with *Pasteurella pestis*, 127

HEART and renal lesions of young rats fed atherogenic diet, influence of dietary magnesium on, 767
Hemolytic anemia, acquired, physical properties of red cell agglutinins in, 689
— streptococci, bacteriophages, factors influencing the interaction of phage and susceptible host cell, 365
Hemophilia, pathogenesis, analysis of anticephalin hypothesis, 273
Hemorrhage, endotoxin, and trauma, vascular manifestations of shock produced by, role of reticulo-endothelial system in resistance to, 403
—, endotoxin, and trauma, vascular manifestations of shock produced by, similarities between reactions in normal and endotoxin-tolerant rats, 383
Hemosiderosis with aid of electron microscopy, relationship between hemosiderin and ferritin, 203
Hepatitis virus, murine, enhancing effect on cerebral activity of pleuropneumonia-like organisms in mice, 179
Heterologous infections, effects of cellular constituents of mycobacteria on resistance of mice to, enhancement of infection, 719
— infections, effects of cellular constituents of mycobacteria on resistance of mice to, protective effects, 703
Homologous antiserum, long chain formation by strains of group A streptococci in presence of, type-specific reaction, 345
Hormones, pituitary adrenocorticotropic and growth, effect on resistance to infection with *Pasteurella pestis*, 127
Host cell, susceptible, and phage, factors influencing interaction, in studies on bacteriophages of hemolytic streptococci, 365
— responses elicited by polysaccharides of animal and plant origin and by bacterial endotoxins, similarity of, 77
Hypercholesteremia and dietary fat in *Cebus* monkey, esterification and disappearance of cholesterol-4–carbon-14, 727
—, magnesium requirement, and atherosclerosis, interrelationships, 757
Hypersensitivity *in vitro*, delayed, in mumps virus infections, 45
— phenomena, participation of complement in passive cutaneous anaphylaxis, 811

IMMUNITY, alterations in properdin levels and resistance to infection following administration of tissue polysaccharides, 99
—, cross-immunity between *Brucella melitensis* and *Mycobacterium tuberculosis*, 545

Immunologic studies of human high density lipoproteins, 261
Infant mice, etiology and transmission of epidemic diarrhea of, 743
Infection induced by oral administration of attenuated poliovirus to persons with homotypic antibody, 159
—, influenza virus, effects of cortisone on dynamics of, 851
—, influenza virus, inhibition of synthesis by cortisone, 883
— of chimpanzees with echo viruses, 677
— of Ehrlich ascites tumor cells with "chick embryo-adapted" Newcastle disease virus, electron microscope study, 617
—, psittacosis virus, latent, of L cells in tissue culture, 39
—, resistance to, and alterations in properdin levels following administration of tissue polysaccharides, 99
—, *Rhizopus oryzae*, mucormycosis, leucopenia with granulocytopenia, 501
— and vaccination used to predetermine antibody response to influenza virus vaccines, 835
—, viral, negation of interference as mechanisms by which cortisone induces increased virus yields, 863
— with *Pasteurella pestis*, effect of pituitary adrenocorticotropic and growth hormones on resistance to, 127
Infections, heterologous, effects of cellular constituents of mycobacteria on resistance of mice to, enhancement of infection, 719
—, heterologous, effects of cellular constituents of mycobacteria on resistance of mice to, protective effects, 703
—, mumps virus, delayed hypersensitivity *in vitro* in, 45
Influenza B virus, slowly reacting enzymatic variants of, isolation and characterization, 53
— virus infection, effects of cortisone on dynamics of, 851
— virus synthesis, inhibition by cortisone, 883
— virus vaccines, predetermination by infection and vaccination of antibody response to, 835
Inhibition of Cx-reactive protein response by blockade of reticuloendothelial system, 321
— of influenza virus synthesis by cortisone, 883
Injection, impairment of antigenicity of protein antigen following, 219
Intestinal bacteria in dietary cirrhosis, 1

KIDNEY and cardiac lesions of young rats fed atherogenic diet, influence of dietary magnesium on, 767
— lesions in systemic lupus erythematosus and chronic membranous glomerulonephritis, role of gamma globulins in pathogenesis of, observation on L.E. cell reaction, 191
— lesions of electrolyte imbalance, structural alterations in potassium-depleted rats, 563

LESIONS, cardiac and renal, of young rats fed atherogenic diet, influence of dietary magnesium on, 767
—, renal, in systemic lupus erythematosus and chronic membranous glomerulonephritis, role of gamma globulins in pathogenesis of, observation on L.E. cell reaction, 191
—, renal, of electrolyte imbalance, structural alterations in potassium-depleted rats, 563
Leucopenia with granulocytopenia in mucormycosis, *Rhizopus oryzae* infection, 501

Leucotoxicity, diphosphopyridine nucleotidase, extracellular product of streptococcal growth and relationship to, 27
Lipoproteins, human high density, immunologic studies of, 261
Lupus erythematosus cell phenomenon, phase contrast and interferometric microscopy of, 607
— erythematosus, nephrosis, and glomerulonephritis, electron microscope study of glomerulus in, 649
— erythematosus, systemic, and chronic membranous glomerulonephritis, role of gamma globulins in pathogenesis of renal lesions in, observation on L.E. cell reaction, 191
— erythematosus, systemic, cytochemical study of L.E. bodies, nucleic acids, 575
— erythematosus, systemic, cytochemical study of L.E. bodies, proteins, 593

MACROGLOBULINEMIA, antigenic relationship of pathological macroglobulins to normal gamma globulins, 467
—, antisera specific for pathological macroglobulins, 477
Magnesium, dietary, influence on cardiac and renal lesions of young rats fed atherogenic diet, 767
— requirement, atherosclerosis, and hypercholesteremia, interrelationships, 757
Mammalian cells, effect of action of x-rays on survival curves of cells from normal human tissues, 485
Man, effect of action of x-rays on survival curves of cells from normal tissues of, 485
—, human and mouse neutrophils, non-virulent group A streptococci phagocytized by, 777
—, immunologic studies of high density lipoproteins in, 261
Man, measurement of human and animal plasminogen and of an activator in human serum, 423
—, organs, single epithelioid and fibroblast-like cells from variety of, growth and genetic characteristics, 145
Membranous glomerulonephritis, chronic, and systemic lupus erythematosus, role of gamma globulins in pathogenesis of renal lesions in, observation on L.E. cell reaction, 191
Metabolism, nucleic acid, growth characteristics of poliovirus in HeLa cells, 641
Microscope study, electron, of glomerulus in nephrosis, glomerulonephritis, and lupus erythematosus, 649
Microscopic study, electron, of incomplete virus formation, infection of Ehrlich ascites tumor cells with "chick embryo–adapted" Newcastle disease virus, 617
Microscopy, electron, in study of hemosiderosis, relationship between hemosiderin and ferritin, 203
—, phase contrast and interferometric, of L.E. cell phenomenon, 607
Monocytes from vaccinated animals, intracellular behavior of *Brucella melitensis* in, cross-immunity between *Brucella melitensis* and *Mycobacterium tuberculosis*, 545
Morphology, fibroblastic, clonal growth *in vitro* of human cells with, 145
Mouth, infection induced by attenuated poliovirus administered by, to persons possessing homotypic antibody, 159
Mucormycosis, *Rhizopus oryzae* infection, leucopenia with granulocytopenia, 501
Mumps virus infections, delayed hypersensitivity *in vitro* in, 45
Mycobacteria, cellular constituents, effects on resistance of mice to

heterologous infections, enhancement of infection, 719
Mycobacteria, cellular constituents, effects on resistance of mice to heterologous infections, protective effects, 703
Mycobacterium tuberculosis and *Brucella melitensis*, cross-immunity between, 545

NEPHRITIS, glomerulo-, chronic membranous, and systemic lupus erythematosus, role of gamma globulins in pathogenesis of renal lesions in, observation on L.E cell reaction, 191
—, glomerulo-, lupus erythematosus, and nephrosis, electron microscope study of glomerulus in, 649
Nephrosis, glomerulonephritis, and lupus erythematosus, electron microscope study of glomerulus in, 649
Neuropathogenicity of group A Coxsackie viruses, 69
Neutrophils, human and mouse, non-virulent group A streptococci phagocytized, 777
Newcastle disease virus, infection of Ehrlich ascites tumor cells with "chick embryo-adapted," electron microscope study, 617
Nucleic acid metabolism in growth characteristics of poliovirus in HeLa cells, 641
— acids, cytochemical study of L.E. bodies of systemic lupus erythematosus, 575
— acids of T_2, T_4, and T_6 bacteriophages, 233
Nucleotidase, diphosphopyridine, extracellular product of streptococcal growth and relationship to leucotoxicity, 27
Nucleotide, diphosphopyridine, streptococcal enzyme acting specifically upon, separation of enzyme from streptolysin O, 15

ORGANISMS, pleuropneumonia-like in mice, enhancing effect of murine hepatitis virus on cerebral activity of, 179
Organs, variety of human, growth and genetic characteristics of single epithelioid and fibroblast-like cells from, 145
Oxygen consumption between thoracic and abdominal aorta, dissimilarity, 357

PAPILLOMA virus, Shope, fluorescent antibody detection of antigens of, in wild and domestic rabbit, 555
Pasteurella pestis, effect of pituitary adrenocorticotropic and growth hormones on resistance to infection with, 127
Pathogenesis of fever, endogenous serum pyrogen and mechanisms governing release, 787
— of fever, fever-producing substances in serum, 293
— of hemophilia, analysis of anticephalin hypothesis, 273
— of renal lesions in systemic lupus erythematosus and chronic membranous glomerulonephritis, role of gamma globulins in, observation on L.E. cell reaction, 191
Pathogenicity, neuro-, of group A Coxsackie viruses, 69
Pathological macroglobulins, antigenic relationship to normal gamma globulins, 467
— macroglobulins, antisera specific for, 477
Phage. *See* Bacteriophages.
Phagocytosis, non-virulent group A streptococci, by human and mouse neutrophils, 777
Physical properties of red cell agglutinins in acquired hemolytic anemia, 689
Pituitary adrenocorticotropic and growth hormones, effect on resistance to infection with *Pasteurella pestis*, 127

Plasmin system, measurement of human and animal plasminogen and activator in human serum, 423
Plasminogen, human and animal, and activator in human serum, measurement of, 423
Pleuropneumonia-like organisms in mice, enhancing effect of murine hepatitis virus on cerebral activity of, 179
Pneumococcus and strains of streptococci, transformation reactions between, 247
Pneumonia, primary atypical, localization, isolation, and cultivation in chick embryos, 455
Pneumonia-like, pleuro-, organisms in mice, enhancing effect of murine hepatitis virus on cerebral activity of, 179
Poliomyelitis virus, attenuated, infection induced by oral administration to persons possessing homotypic antibody, 159
— virus in HeLa cells, growth characteristics, nucleic acid metabolism, 641
— virus precipitins, study by diffusion in agar, 661
Polypeptide renin substrate, preparation, purification, and amino acid sequence of, 439
Polysaccharides of animal and plant origin and bacterial endotoxins, similarity of host responses elicited by, 77
—, tissue, alterations in properdin levels and resistance to infection following administration of, 99
Potassium-depleted rats, structural alterations in, renal lesions of electrolyte imbalance, 563
Precipitins, poliovirus, study of diffusion in agar, 661
Properdin levels, alterations in, and resistance to infection following administration of tissue polysaccharides, 99
Protein antigen, impairment of antigenicity following injection, 219
—, Cx-reactive, effect of administration to normal rabbits, 315
—, Cx-reactive, inhibition of response by blockade of reticulo-endothelial system, 321
Proteins, cytochemical study of L.E. bodies of systemic lupus erythematosus, 593
—, lipo-, immunologic studies of human high density, 261
Psittacosis virus infection, latent, of L cells in tissue culture, 39
Pyridine, diphospho-, nucleotidase, extracellular product of streptococcal growth and relationship to leucotoxicity, 27
—, diphospho-, nucleotide, streptococcal enzyme acting specifically upon separation of enzyme from streptolysin O, 15
Pyrogen, endogenous serum, mechanisms governing release, in pathogenesis of fever, 787

RADIOACTIVE carbon–cholesterol-4, esterification and disappearance in studies on dietary fat and hypercholesteremia in *Cebus* monkey, 727
— sulfur, sulfate labelled with, turnover in epiphyses and diaphyses of suckling rats, nature of, 509
Radiocholesterol, esterification and disappearance of, in studies on dietary fat and hypercholesteremia in *Cebus* monkey, 727
Red cell agglutinins, physical properties, in acquired hemolytic anemia, 689
Renal. *See* Kidney.
Renin substrate, polypeptide, preparation, purification, and amino acid sequence of, 439
Resistance of mice to heterologous infections, effects of cellular constituents of mycobacteria on, enhancement of infection, 719

Resistance of mice to heterologous infections, effects of cellular constituents of mycobacteria on, protective effects, 703
— to infection and alterations in properdin levels following administration of tissue polysaccharides, 99
— to infection with *Pasteurella pestis*, effect of pituitary adrenocorticotropic and growth hormones on, 127
— to shock produced by endotoxin, trauma, and hemorrhage, role of reticulo-endothelial system in, vascular manifestations, 403
Reticulo-endothelial system in resistance to shock produced by endotoxin, trauma, and hemorrhage, vascular manifestations, 403
— system, inhibition of Cx-reactive protein response by blockade of, 321
Rhizopus oryzae infection, mucormycosis, leucopenia with granulocytopenia, 501

SEROLOGICAL types, three, differentiation of group A streptococci with R antigen into, bactericidal test, 525
Serum, fever-producing substances in, studies on pathogenesis of, 293
—, human activator in, and human and animal plasminogen, measurement of, 423
— pyrogen, endogenous, mechanisms governing release, in pathogenesis of fever, 787
Shock produced by endotoxin, trauma, and hemorrhage, vascular manifestations, role of reticulo-endothelial system in resistance to, 403
— produced by endotoxin, trauma, and hemorrhage, vascular manifestations, similarities between reactions in normal and endotoxin-tolerant rats, 385
Shope papilloma virus in wild and domestic rabbit, fluorescent antibody detection of antigens, 555
Specific antisera for pathological macroglobulins, 477
—, type-, reaction, long chain formation by strains of group A streptococci in presence of homologous antiserum, 345
Sterone, desoxycortico-, mimetic, action of ammoniated glycyrrhizin, 415
Streptococcal enzyme acting specifically upon diphosphopyridine nucleotide, separation from streptolysin O, 15
— growth, diphosphopyridine nucleotidase extracellular product and relationship to leucotoxicity, 27
Streptococci, group A, differentiation with R antigen into three serological types, bactericidal test, 525
—, hemolytic, bacteriophages, factors influencing the interaction of phage and susceptible host cell, 365
—, long chain formation by strains of group A formation, in presence of homologous antiserum, type-specific reaction, 345
—, non-virulent group A, phagocytized by human and mouse neutrophils, 777
— strains and pneumococcus, transformation reactions between, 247
Streptolysin O, separation of streptococcal enzyme acting specifically upon diphosphopyridine nucleotide from, 15
Sulfate labelled with radioactive sulfur, turnover in epiphyses and diaphyses of suckling rats, nature of, 509
Sulfur-35, sulfate labelled with, turnover in epiphyses and diaphyses of suckling rats, nature of, 509

Susceptible host cell and phage, factors influencing interaction, in studies of bacteriophages of hemolytic streptococci, 365

THORACIC and abdominal aorta, oxygen consumption between, dissimilarity, 357
Tissue culture, L cells in, latent infection with psittacosis virus, 39
— polysaccharides, alterations in properdin levels and resistance to infection following administration of, 99
Tissues, normal human, effect of action of x-rays on survival curves of cells from, 485
Toxicity, leuco-, diphosphopyridine nucleotidase, extracellular product of streptococcal growth and possible relationship to, 27
Transmission and etiology of epidemic diarrhea of infant mice, 743
Trauma, hemorrhage, and endotoxin, vascular manifestations of shock produced by, role of reticulo-endothelial system in resistance to, 403
—, hemorrhage, and endotoxin, vascular manifestations of shock produced by, similarities between reactions in normal and endotoxin-tolerant rats, 385
Tumor cells, Ehrlich ascites, infection with "chick embryo–adapted" Newcastle disease virus, electron microscope study, 617
— cells, mouse, natural antibody in rejection by chick embryo, 111

VACCINATED animals, intracellular behavior of *Brucella melitensis* in monocytes from, cross-immunity between *Brucella melitensis* and *Mycobacterium tuberculosis*, 545
Vaccination and infection used to predetermine antibody response to influenza virus vaccines, 835
Vascular manifestations of shock produced by endotoxin, trauma, and hemorrhage, role of reticulo-endothelial system in resistance, 403
— manifestations of shock produced by endotoxin, trauma, and hemorrhage, similarities between reactions in normal and endotoxin-tolerant rats, 385
Virulent, non-, group A streptococci phagocytized by human and mouse neutrophils, 777
Virus formation, incomplete, electron microscopic study, infection of Ehrlich ascites tumor cells with "chick embryo–adapted" Newcastle disease virus, 617
—, hepatitis, murine, enhancing effect on cerebral activity of pleuropneumonia-like organisms in mice, 179
— infection, influenza, effects of cortisone on dynamics of, 851
— infection, psittacosis, latent, of L cells in tissue culture, 39
— infections, mumps, delayed hypersensitivity *in vitro* in, 45
—, influenza B, slowly reacting enzymatic variants of, isolation and characterization, 53
—, Newcastle disease, "chick embryo–adapted," infection of Ehrlich ascites tumor cells with, electron microscope study, 617
—, poliomyelitis, attenuated, infection induced by oral administration to persons possessing homotypic antibody, 159
—, poliomyelitis, in HeLa cells, growth characteristics, nucleic acid metabolism, 641
—, poliomyelitis, precipitins, study by diffusion in agar, 661
—, primary atypical pneumonia, localization, isolation, and cultivation in chick embryos, 455

Virus, Shope papilloma, in wild and domestic rabbit, fluorescent antibody detection of antigens of, 555
— synthesis, influenza, inhibition by cortisone, 883
— vaccines, influenza, predetermination of antibody response to, by infection and vaccination, 835
— yields, increased, negation of interference as mechanisms by which cortisone induces, 863
Viruses, echo, infection of chimpanzees with, 677
—, group A Coxsackie, neuropathogenicity, 69

X-RAY action, effect on survival curves of cells from normal human tissues, 485
